EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with F. Brice Faller on January 5, 2005.

The application has been amended as follows to cancel the claims withdrawn from consideration:

Cancel claims 5-15.

The following is an examiner's statement of reasons for allowance: the prior art does not teach or suggest a method of producing a gravure printing plate in a printing machine, said method comprising

providing a thermal transfer film carrying a thermal transfer material in proximity to a surface of a gravure printing plate cylinder in a printing machine,

selectively ablating said thermal transfer material using a laser image-setting unit to selectively apply said thermal transfer material directly to the surface of said printing plate cylinder, thereby forming an etching mask directly on said printing plate cylinder in said printing machine, said etching mask defining image points and non-image points directly on said printing plate carrier by covering said non-image points on said cylinder, and

etching gravure printing cells by applying acid where said thermal transfer material has not been applied to said surface of said cylinder, as in the context of claim 1.

Applicant's remarks are persuasive in that the closest prior art, Bauer, does not suggest to produce a gravure printing plate in a printing machine by selectively ablating thermal transfer material using a laser to apply an etch mask directly to the gravure printing plate cylinder, as in the context of claim 1. Rather, Bauer has an intervening light sensitive recording layer present. Therefore the thermal transfer material does not form an etch mask directly on the cylinder, and there is no motivation to remove the intervening layer in the method of Bauer.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Anita K Alanko whose telephone number is 571-272-1458. The examiner can normally be reached on Mon-Fri until 2:30 pm (Wed until 11:30).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Nadine Norton can be reached on 571-272-1465. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
